- Certified and experienced consultants.

Cloud Assessment and Migration Service

More and more businesses are looking at cloud adoption, to help ease the rising costs and growing demands on the data centre. At Covenco we can help develop and implement cloud strategies with our Azure Cloud Assessment and Migration Service.

The service is designed to help organisations determine which workloads are ready to move to Azure and when the time is ready to migrate, we ensure it is done so with the best-in-class deployment, through our expert support. Cloud Assessments and migrations vary on scale, duration, cost and complexity and can be tailored to fit each organisation's needs.

Azure Cloud Assessment

Covenco's Azure Cloud Assessment will provide your organisation with an end-to end review

What happens next ...

Once the assessment is complete, business applications are migrated to the cloud following a tested and highly automated process with minimal down time. Our Migration Service for cloud uses best practice methodologies to assess the infrastructure and applications, plan and design the migration, and implement a consolidated, flexible, and resilient server environment. Once your migration is complete, Covenco can offer a fully managed IT service.

About Covenco

With more than 30 years of experience in the IT industry across a range of technologies. Covenco specializes in purchasing, selling and renting new and refurbished IBM, HP, Dell and NetApp computing hardware, storage and supporting software.
