

Veeam Backup *for Salesforce*

Your Data. Your Responsibility.

Challenge

There's no arguing the growth and business criticality of Salesforce data, yet organizations rarely back it up. It's your Salesforce data – you control it – and it is your responsibility to protect it.

Veeam Backup *for Salesforce* eliminates the risk of losing your Salesforce data and metadata – so that your business is reliably protected, giving you complete control. Veeam Backup *for Salesforce* allows you to own your data, avoid storage lock-in and deploy your backup environment anywhere you choose. Purpose-built for Salesforce using native API's, we help you protect against human error and integration issues by restoring records, fields, files, and metadata with just a click.

- Deploy on-premises or in the Cloud
- Powered by Salesforce APIs
- Backup and restore data and metadata

Key capabilities

Salesforce-native

Purpose-built to back up and restore Salesforce data and metadata.

Custom scheduling

Set granular backup schedules and retention settings at the object level.

See and compare

See versions of records and metadata and quickly compare it with production.

Fast and flexible recovery

Recover Salesforce records, hierarchies, fields, files, and metadata.

Simplified management

Manage several Salesforce instances from one console.

Simple and easy-to-use UI

Click, click, click, and done. Run backup policies and restore jobs in minutes.

Secure your data

Own your data. Run your backup environment anywhere: On-premises, in AWS, Azure and more.

Incremental changes

With incremental sync and flexible scheduling, you can back up your Salesforce data almost continuously.

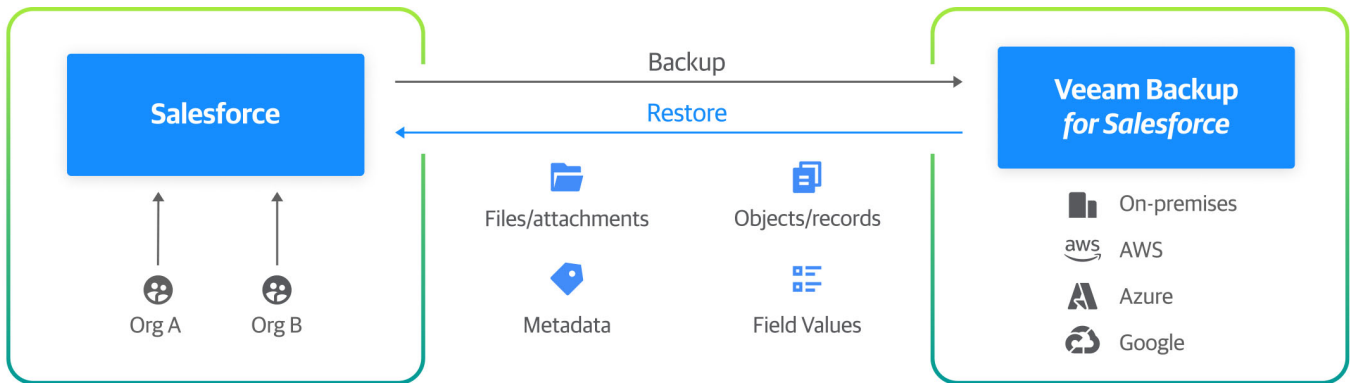

Restore hierarchy

Granularly restore linked child objects to any record. You can restore parents' records as well.
